BUILDING TYPE II AND III MITIGATION INSPECTION FORM

2.	Roof Deck Attachment
	Level A – Wood or Other Deck Type II only Roof deck composed of sheets of structural panels (plywood or OSB). Or
	Architectural (non-structural) metal panels that require a solid decking to support weight and loads. Or
	Other roof decks that do not meet Levels B or C below.
	Level B – Metal Deck Type II or III Metal roof deck made of structural panels fastened to open-web steel bar joists and integrally attached to the wall.
	☑ Level C – Reinforced Concrete Roof Deck Type, II or III
	A roof structure composed of cast-in-place or pre-cast structural concrete designed to be self-supporting and integrally attached to wall/support system.
3.	Secondary Water Resistance N/A - Reinforced concrete roof deck
	Underlayment A self-adhering polymer modified bitumen roofing underlayment (thin rubber sheets with peel and stick underside located beneath the roof covering and normal felt underlayment) with a minimum width of 6" meeting the requirements of ASTM D 1970 installed over all plywood/OSB joints to protect from water intrusion. All secondary water resistance products must be installed per the manufacturer's recommendations. Roofing felt or similar paper based products are not acceptable for secondary water resistance.
	Foamed Adhesive A foamed polyurethane sheathing adhesive applied over all joints in the roof sheathing to protect interior from water intrusion.
4.	Opening Protection N/A - Some glazed openings are not rated or protected
	Class A (Hurricane Impact) – All glazed openings (windows, skylights, sliding glass doors, doors with windows, etc) less than 30 feet above grade must be protected with impact resistant coverings (e.g. shutters), impact resistant doors, and/or impact resistant glazing that meet the Large Missile (9 lb.) impact requirements of:
	□SSTD12;
	☐ASTM E 1886 and ASTM E 1996;
	☐Miami-Dade PA 201, 202, and 203;
	☐Florida Building Code TAS 201, 202 and 203.
	All glazed openings less than 30 feet above grade shall meet the Large Missile Test standard referenced above. All glazed openings between 30 and 60 feet above grade must meet the Small Missile Test of the respective standard. For buildings located in the HVHZ (High Velocity Hurricane Zone) all glazed openings greater than 60 feet above grade must also meet the Small Missile Test of the respective standard.
	Class B (Basic Impact) – All glazed openings (windows, skylights, sliding glass doors, doors with windows, etc) less than 30 feet above grade must be protected with impact resistant coverings (e.g. shutters), impact resistant doors, and/or impact resistant glazing that meet the Large Missile (4.5 lb.) impact requirements of:
	☐ASTM E 1886 and ASTM E 1996
	All glazed openings less than 30 feet above grade shall meet the Large Missile Test standard referenced above. All glazed openings between 30 and 60 feet above grade must meet the Small Missile Test of the respective standard. For buildings located in the HVHZ (High Velocity Hurricane Zone) all glazed openings greater than 60 feet above grade must also meet the Small Missile Test of the respective standard.

*This verification form is valid for up to five (5) years provided no material changes have been made to the structure or inaccuracies found on the form.
